Sound Healing Strategies Residential Retreat

2011 Website Program Description

A revolutionary approach to counseling and healing, Hemi-Sync can provide your clients with tools that help heal old wounds, soothe stressed emotions, cut through resistance and fears, and structurally change perceptions and beliefs in a way that is surprisingly rapid and compassionate. Based on decades of research, this simple technology—easy to learn and easy to apply—provides therapists and their clients with methods for real change, and in a time-frame pleasing to those who are required to offer "brief therapies." Over 20,000 people have taken The Monroe Institute's educational programs for personal use and countless professionals have applied this approach in their practices. This basic introduction is finally being offered.

- Register: Not yet scheduled.
- Very reasonably priced at: $595
  (includes meals, lodging, seminar activities, and local transportation)
